

## **INDO-FRENCH JOINT LABORATORY FOR NATURAL PRODUCTS AND SYNTHETIC FOR AFFORDABLE HEALTH (NPSAH)**

**Duration: 2016-2019**

The mission of this Indo-French Joint Laboratory is to create knowledge wealth with high impact in the areas of chemistry at the interface with life sciences towards a more affordable health.

The main topics included are:

- i. Isolation, identification, characterisation and biological studies of new natural products, both from India and France,
- ii. Development of new synthetic methods and applications to the preparation of bioactive molecules in the areas of interest for the joint Laboratory,
- iii. Total synthesis of natural products in the area of interest for the joint Laboratory,
- iv. To explore development of catalysts and chemical tools to support the synthesis and biological studies of compounds relevant to the area of interest for the joint Laboratory,
- v. Medicinal Chemistry and Chemical Biology, with special interest in Cancer and in the Central Nervous System.

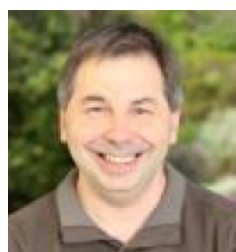

### **Partners:**

The Centre National de la Recherche Scientifique  
The University of Rennes 1  
The Ecole Nationale Supérieure de Chimie de Rennes  
The Institut National des Sciences Appliquées de Rennes  
The Council of Scientific and Industrial Research  
Institut des sciences chimiques de Rennes

### **Coordinators:**

Srivari Chandrasekhar  
CSIR-Indian Institute of Chemical Technology

Joël BOUSTIE  
Institut des sciences chimiques de  
Rennes
